

CAPACITY BUILDING OF BIODIVERSITY PRACTITIONERS, SCIENTISTS AND POLICYMAKERS FOR SUSTAINABLE MANAGEMENT OF PROTECTED AREAS AND FOREST ECOSYSTEMS IN AFRICA

THE PROJECT

Aims to support environmental policies and investments for the sustainable, participatory and equitable management of protected areas and forest ecosystems in Africa, as well as to contribute to capacity building of biodiversity practitioners, scientists and policy makers in the production and use of information needed for the said sustainable management. This is meant to be achieved through advanced training at master and PhD level in the Unesco Regional Post-Graduate Training School on Integrated Management of Tropical Forests and Lands (ERAIFT) and its partner institutions, as well as ongoing training of actors involved in sustainable management of protected areas and forest ecosystems in Africa.
